

CityCAD 1.6.5 Released

NEWS ITEM 13 May 2009

Holistic City Software has released CityCAD 1.6.5, the latest version of the urban design software tool. This is a maintenance release, meaning there aren't any significant new features, but our development team has made many improvements, bug-fixes and performance enhancements behind the scenes.

Holistic City Software has released CityCAD 1.6.5, the latest version of the urban design software tool. This is a maintenance release, meaning there aren't any significant new features, but our development team has made many improvements, bug-fixes and performance enhancements behind the scenes.

Drawing 3D routes

A minor improvement is that you can now type a 3D vector to draw a route. For example, if you click at a point with the Route Tool, then type 100,30,2.5 and press enter, then a route will be drawn to a point 100m to the east, 30m to the north and 2.5m above the zero level.
